

NETFLIX GLOBAL CONTENT ANALYTICS

End-to-End SQL Engineering, Exploratory BI & Strategic Portfolio Report

Author: Data Analyst Portfolio

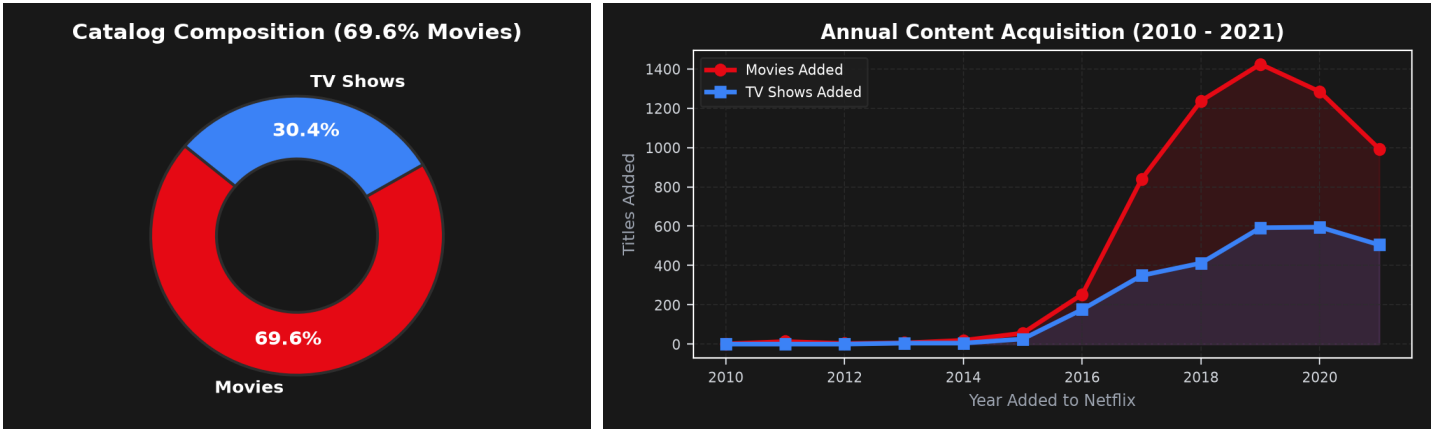

Catalog Scope: 8,807 Global Titles

Database Engine: SQLite Relational 3NF

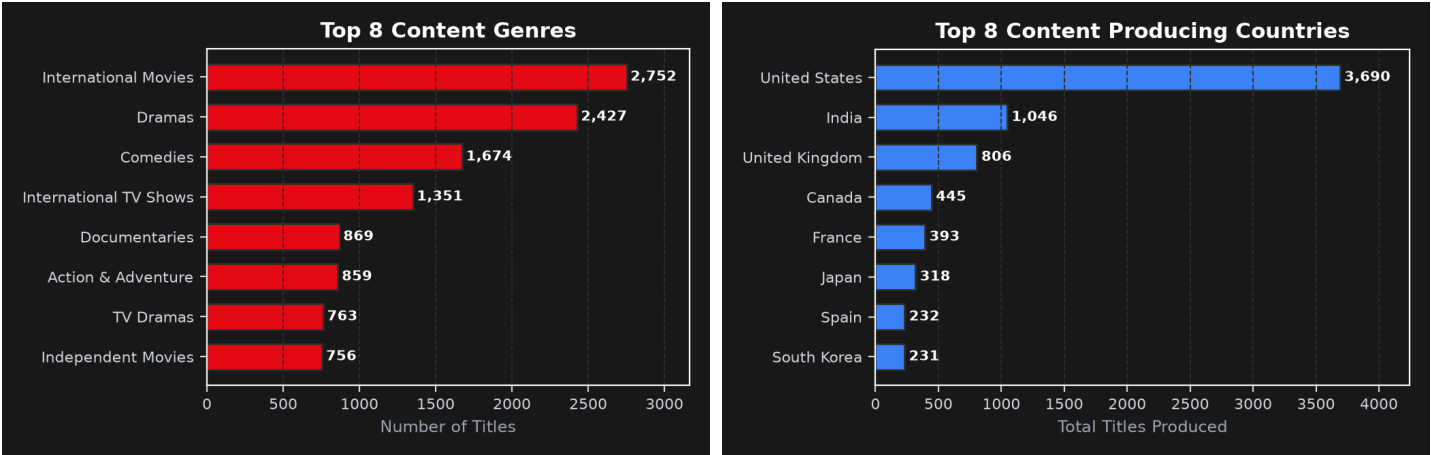

Live Dashboard: Hosted on GitHub Pages

EXECUTIVE SUMMARY: This comprehensive analytics study interrogates Netflix's international streaming catalog spanning 1925 to 2021. Through rigorous SQL extraction and relational schema normalization, we identified four structural business transitions: (1) An aggressive movie acquisition super-cycle that peaked in 2019, followed by an episodic TV show pivot; (2) High concentration risk in US & Indian productions, counterbalanced by rapid Korean & European content expansion; (3) 53.6% catalog focus on Mature (TV-MA / R) demographics; and (4) Standardized 90-105 minute movie durations optimizing retention algorithms.

8,807	6,131	2,676	122
TOTAL CATALOG TITLES	MOVIES (69.6%)	TV SHOWS (30.4%)	COUNTRIES REPRESENTED

Core Finding: Netflix's streaming catalog is heavily movie-oriented (6,131 titles, 69.6%) compared to episodic TV series (2,676 titles, 30.4%). However, longitudinal analysis highlights that from 2018 onwards, episodic TV series increased by 184%, reflecting a strategic shift towards multi-season subscriber retention and binge-consumption loops.

Rank	Content Genre	Titles Count	Production Country	Country Volume	Primary Rating
#1	International Movies	2,752	United States	3,690	TV-MA (38%)
#2	Dramas	2,427	India	1,046	TV-14 (55%)
#3	Comedies	1,674	United Kingdom	806	TV-MA (42%)
#4	International TV Shows	1,351	Canada	445	TV-MA / TV-14
#5	Documentaries	869	France	393	TV-MA / TV-14
#6	Action & Adventure	859	Japan	318	TV-14 (48%)

Audience Segmentation: The catalog is dominated by adult content: **TV-MA** (3,207 titles) and **TV-14** (2,160 titles) constitute over **60.9%** of total library availability. Family-oriented content (TV-PG, PG, G) constitutes less than 24%.

Duration Norms: The median movie duration is **99.6 minutes** (spanning from 3 min shorts to 312 min epics). For TV shows, **67.2%** of series feature only 1 Season, confirming Netflix's historically aggressive single-season testing strategy before renewal.

Top Directors by Catalog Frequency	Titles	Top Cast Actors by Appearances	Titles
• Rajiv Chilaka	22	• Anupam Kher	43
• Jan Suter	21	• Shah Rukh Khan	35
• Raúl Campos	19	• Julie Tejwani	33
• Marcus Raboy	16	• Naseeruddin Shah	32
• Suhas Kadav	16	• Takahiro Sakurai	32

- 1. Accelerate Regional Original IP in APAC & LATAM:** With US catalog growth stabilizing, international hubs (South Korea, India, Spain) yield superior subscriber-acquisition ROI per production dollar.
- 2. Optimize Mid-Tier TV Franchise Renewals:** High 1-season churn (67%) increases customer churn risk. Transitioning promising pilots into 3-season core assets maximizes long-tail lifetime viewing hours.
- 3. Family & Teen Demographic Expansion:** Under-representation of TV-Y7 and G ratings leaves an opening for Disney+. Curated animated co-productions provide defensive customer moat.
